

BITTER GMBH

ANLAGENBAU & FÖRDERELEMENTE

Precision in metal

Welding Technology and CNC Machining

Powerful. Versatile. Reliable.

Learn more about our expertise in design, CNC machining, welding technology and the latest developments at BITTER Anlagenbau.

With modern machines, experienced specialists and high quality standards, we support our customers as a reliable partner - from the initial design to the precisely manufactured solution.

This flyer provides a compact overview of our range of services and will be updated regularly as soon as new technical possibilities, extensions or service offers arise within our company.

Our services – everything from a single source:

- Design and manufacturing of systems according to customer requirements
- CNC machining of large components and welded structures
- 5-axis milling and multi-sided machining
- Professional welding technology according to the highest standards
- Complete service: from development to final painting

About us & our services

BITTER Anlagenbau & Förderelemente GmbH is your partner for individual solutions in mechanical and plant engineering—with a clear focus on the development and production of complex components, welded structures and conveyors systems according to customer-specific requirements .

Our experienced team plans and implements large-scale structures as well as complete conveyor systems—from the initial technical drawing to delivery. Whether **roller conveyors, chain conveyors or custom solutions**: we design and manufacture conveyor components entirely in-house, precisely tailored to your process.

Thanks to our powerful machinery, we process workpieces up to **13200 x 1600 x 2100 mm** efficiently and precisely. We offer all services from a single source—from material procurement to CNC machining and welding, all the way to painting and delivery.

Our strength lies in technical versatility, rapid implementation of individual requirements and the commitment to bringing every solution to the point in terms of cost-effectiveness and functionality .

New in our machinery:

Mazak QUICK TURN 400 L

With the purchase of the **Mazak QUICK TURN 400 L**, we are making a targeted investment in the future of our production. This modern, next-generation CNC turning center stands for maximum performance, precision and process reliability— even for complex machining operations and high volumes.

The QUICK TURN 400 L enables even more efficient production of medium to large turned parts while maintaining consistently high quality. It's robust design, powerful drive unit and intelligent control system make it perfectly suited for demanding applications in mechanical and plant engineering.

Thanks to this expansion, we can make our range of services even more flexible and respond specifically to the individual requirements of our customers—**faster, more precise and more economically** than ever before.

Our investment in modern technologies is your advantage: **More options. Shorter lead times. Highest quality.**
